

The Herrington Report

October 17-19, 2011

Class Wikispace Webpage

<http://armstrong-herrington.wikispaces.com>

If you are wanting to do some extra research on the electromagnetic spectrum for your group projects, there is a lot of good information on the classroom website. The rubric for this project is available under the assignments tab on the left hand side of the website.

I will be adding new pictures from the labs and activities we have done in the last couple of weeks by the end of the week. There has also been a Homework page added to the site, which will have the homework assignments and documents. This is so you can check the site and reprint if necessary.

Vocabulary and Key Terms:

Electromagnetic spectrum, transverse waves, infrared waves, ultraviolet rays, gamma rays, microwaves, radio waves, visual light waves, polarized filters

Homework:

Mon./Tues.— **Work on group project if there is any outside work that needs to be done.**

Otherwise, we will work on it in class.

Wed.— None

ScienceFun Night

Science Fun Night Postponed

Unfortunately, due to the rescheduling of the junior high football game that was rained out this past Thursday, our **Science Fun Night** has been postponed.

The principal and curriculum specialist are in the process of getting us a new date for the family night. As soon as I know the date, I will print new flyers to send home. If you have any suggestions or information you think would be neat to share at the family fun night, let me know. I sincerely hope this postponement will just gather more enthusiasm for the night. I think it will be lots of fun!!
